

# ASSUMPTIONS

1. flat and hall are building. Hall and flat are the subclass of building(superclass).
2. each flat and hall have many rooms. In flat each room may have three, four or five bedrooms. But in hall, each room has only one bedroom.
3. each flat can be inspected by many staff, meanwhile each staff can inspect many flats. But a staff can only inspect a hall once per day.
4. the bedrooms in room of flat have the same rent rate.
5. a hall manager can be responsible to many halls. But one hall can be managed by only one manager.
6. A student only has one course
7. A category can only have one advisor, and different category has just one course different from other category
8. A course is taught in a fixed room, which has a special telephone number.
9. Each hall has a special telephone number.

# ER DIAGRAM

# RELATIONAL SCHEMA

(using normalization)

1. ADVISOR (advId, advName, advPos, advDept, advTel, advRoom)
2. STUDENT (stuNum, *stuCategory*, stuName, stuAddress, stuDOB, stuSex, stuNat, stuSmoker, stuSpeNeeds, stuAddComments, stuStatus)
3. STUDENT1(stuCategory, *stuCourse*, *stuAdvId*)
4. COURSE (courseNum, *courseRoomNum*, courseTitle, courseLeader, courseDept)
5. Course1(courseRoomNum, courseTel)
6. NEXT-OF-KIN (*nokStuNum*, nokName, nokRelation, nokAdd, nokTel)
7. INVOICES (invNum, *invLeaseNum*, *invStuNum*, *invPlaNu*m, invSemester, invPayDue, invAdd, invAddData)
8. INVOICES1(*invStuNum*, invStuName)
9. INVOICES2(*invPlaNu*m, invRoomNum)
10. LEASES (leaseNum, *leaseStuNum*, *leasePlaNu*m, leaseDur, leaseAdd, leaseRoomNum, leaseEnterDate, leaseLeaveDate)
11. LEASES (*leaseStuNum*, leaseName)
12. INSPECTION (inspDate, *insBuildingNum*, *inspStaffNum*, inspCom, inspIndication, inspStaffName)
13. ROOM (placeNum, rentRate)
14. ROOM1(placeNum, *buildingNum*, roomNum)
15. STAFF (staffNum, *staffPos*, staffName, staffAdd, staffDOB, staffSex)
16. STAFF1(staffPos, staffLoc)
17. HALL (*buildingNum*, *buildingTel*)
18. HALL1(buildingTel, *managerNum*, buildingAdd, hallName)
19. FLATS (*flatbuildingNum*, *buildingTel*)
20. FLATS (buildingTel, buildingAdd, availableBedroomAmount)
21. FREEROOMDETAIL (freeplaceNum, *flatBuildingNum*,)

22. FREEROOMDETAIL1(*flatBuildingNum*, freeBedroomAmount)

Note: underline and bold means primary key, italic and bold means foreign key.

These relations are in 4th Normal Form since there isn't partial dependency(2NF) and transitive dependency(3NF). Meanwhile every determinant is a candidate key, so it is a BCNF. Last but not least, each relation contains no nontrivial multivalued dependencies. So they are in 4NF.

e.g.

FREEROOMDETAIL (**freeplaceNum**, ***flatBuildingNum***, freeBedroomAmount)

fd1: **freeplaceNum** -> ***flatBuildingNum***, freeBedroomAmount (primary key)

fd2: ***flatBuildingNum*** -> freeBedroomAmount (transitive dependency)

no partial dependency means it has already in 2NF

FREEROOMDETAIL (**freeplaceNum**, ***flatBuildingNum***,)

FREEROOMDETAIL1(*flatBuildingNum*, freeBedroomAmount)

It is in 3NF.

Every determinant is a candidate key, so it is a BCNF. And each relation contains no nontrivial multivalued dependencies. So they are in 4NF.
